Pizza Sauce

Rich semi-sweet tomato sauce seasoned with oregano and basil, with chunks of peppers, onions, and garlic

Yield:

5 pints or 1 pint

Ingredients:

5 pints tomato sauce (see directions)

1 1/2 cups chopped onions

3 cloves garlic, minced

1 cup chopped sweet peppers or bell peppers

1/2 cup white sugar

2 tablespoons salt

5 teaspoons oregano

2 teaspoons black pepper

2 teaspoons basil

2 tablespoons arrowroot or cornstarch

a little tomato juice (set some aside when draining)

Instructions:

1.To

make 5 pints of tomato sauce, you will need about 20 pounds of tomatoes

(1.5 pecks, approximately). You can, however, make sauce out of

whatever tomatoes you have on hand and adjust the seasonings according

to how much sauce you have.

Prepare tomatoes as follows: wash and core tomatoes and put into a large pan(s) and cook until soft and mushy (at least one hour). Be careful to stir every now and then and keep the heat reasonable so they don't scorch... scorched tomatoes taste awful!

2. Using a small pan or large scoop, put hot tomatoes into a strainer

to drain off the watery juice. (We use a mesh wire strainer.)

When

tomatoes have drained somewhat (10-20 minutes), run them through a

colander, which will remove the seeds and skins. (Another way is to

drain the tomatoes and then run through a blender or food processor.)

While you process one batch, have another batch in the strainer to

drain.

3. Put sauce into a clean pan, and continue until all tomatoes are

processed. You should now have a tomato sauce, which could be canned as

is, or you can season for pizza/spaghetti, etc. Usually once you have the tomatoes processed, then you know how much sauce you will end up with. The above measurements were per 5 pints of processed sauce.

4. Cook onions, garlic, and peppers in a pan on the stove with a little tomato juice until tender before adding to sauce.

5. While you are cooking the onions, peppers, and garlic, add the white sugar, salt, oregano, black pepper, basil, and arrowroot or cornstarch, mixed with a little tomato juice (set some aside when draining). Stir sauce to mix thoroughly and bring to a boil so it thickens. You may need more thickener depending on how well-drained your tomatoes were and your own preference.

6. If preserving, put into jars and process for 25 minutes (for pints; 35 minutes for quarts). (You can open-kettle this, like salsa, but it gets kind of messy because the sauce is thick and splashes when it boils.)

Additional Notes:

So, you don't have enough tomatoes to make a huge batch of sauce, but you want some yummy home made pizza sauce to use on tonight's pizza? Here you go:

1. Wash and dice your tomatoes (You will probably need about 6 c after they are diced), so there are no large pieces of peeling.

(Alternately, wash tomatoes and put into a large bowl. Pour boiling water over, let set for a few minutes, and remove peeling. Then dice.)

2. Put tomatoes into a pan on the stovetop, and start cooking. Add

some sugar (1.5 T), salt (1/2 t), oregano (1/2 t), black pepper, and

basil (1/4 t). Those measurements are all approximate... just taste and alter as you wish.

3. Simmer until sauce thickens (this will take at least an hour, so

make sure you have plenty of time!). You can hurry the process a little

by thickening with cornstarch (mix 1-2 T cornstarch with cold water or

reserved tomato juice, then add to boiling tomatoes, stirring immediately to prevent lumps).

4. When sauce is to desired thickness, you're done! Enjoy! ☐

Cherry Pie Filling

Colorful homemade cherry pie filling

Yield:

About 3 cups

Ingredients:

3 cups pitted sour cherries*

1 1/2 cups sugar

approximately 1/2 cup water

approximately 1-2 tablespoons clear jel or cornstarch, for thickening

(Please see additional notes before making!)

Instructions:

1.

Combine fruit and sugar in a pan and stir together. If cherries are soft and mushy, you won't need additional water, but if cherries are firm, add 1/4 to 1/2 cup water. Bring to a boil.

2. Mix cornstarch or clear jel** with some cold water or reserved cherry juice (about 2 tablespoons of cold water with 2 tablespoons corn starch or clear jel), whisking to remove lumps.

3. When cherries are boiling, add thickening while stirring constantly to prevent lumps. Add enough thickening to make the consistency you desire. We like our pies fairly thick, but cheesecake topping thinner. Stir the thickening as it bubbles, just until the juices are clear. (When the filling looks clear, it's fully cooked.

Over-cooking will start to break down the filling.)

4. Pour into pie crusts (unbaked pastry) for pies (bake pies at 425 degrees for about 30 minutes or until browned) or use as topping in other recipes.

Additional Notes:

*You

can use sour or sweet cherries for this recipe, but you will need to adjust the sugar if using sweet cherries. I would use about 1/2 to 3/4 cup of sugar for sweet cherries. If using sweet cherries, you may wish to add a tablespoon of lemon juice or a pinch of citric acid, since sweet cherries won't be as tart as sour cherries.

The texture of the cherries will also make a difference in this recipe. I have used really ripe sour cherries from my parents' trees, and those are very juicy and tart, needing no additional water or citric acid. I have also used sweet cherries from a neighbor's tree, and those were again, really ripe and soft and made a nice juicy filling!

However, using firmer cherries from a store will necessitate the addition of some water... and you can also boil the cherries, sugar, and water for several minutes without risk of them falling apart and looking mushy in your pies or on your cheesecakes. □

**Cornstarch thickens, and will continue to become thicker as your mixture cools. Do not make it as thick when hot as you would like it to be when it has cooled, or it will be too thick.

Clear jel, however, is the same thickness hot as it is cold. We prefer clear jel for thickening pie filling, as it is easier to see the consistency, and the pies don't tend to run over in the oven as easily.

Flavorful and crisp, these homemade dill pickles are easy and delicious!

1/2 teaspoon powdered alum
